SUMMARY

Full Stack Developer (MERN) with 6+ months of internship experience building and shipping production-ready web applications. Proven ability to deliver features end-to-end from REST API design and JWT authentication to responsive React UIs and cloud deployments. Hands-on with Next.js, TypeScript, PostgreSQL, and third-party integrations (Clouinary, Resend, Google OAuth). Looking for an SDE-1 role to solve real problems at scale.

EDUCATION

Sree Chaitanya College of Engineering

B.Tech in Computer Science & Design (CSD) CGPA: 7.2/10

Karimnagar, IN

2022 – 2026

INTERNSHIP EXPERIENCE

Code for India

Full Stack Developer Intern

Hyderabad, IN

May 2026 – Jul 2026

- Delivered a full-stack **Application Management System (AMS)** independently, handling everything from database schema design to frontend role-based routing.
- Implemented RBAC across 3 user roles — Super Admin, Webinar Host, and Student — with protected REST APIs and fully separated role-specific dashboards.
- Integrated **Google OAuth** for one-click sign-in and **Resend** for automated transactional emails across all user roles.

Good Barley Co

Full Stack Developer Intern

Hyderabad, IN

Dec 2025 – May 2026

- Built and tested responsive UIs, managed MongoDB database operations, and optimized backend API performance for an early-stage startup product.
- Contributed across the full stack — from REST API development and database design to product promotion and content optimization initiatives.

PROJECTS

E-Commerce Platform | React, Node.js, Express.js, MongoDB, JWT, Resend, Tailwind CSS

- Built a production-grade full-stack e-commerce app with separate user and admin dashboards, product management, cart, and order tracking.
- Implemented JWT authentication with protected routing, admin RBAC, and automated order confirmation emails via Resend.
- Designed and tested 20+ RESTful API endpoints across auth, products, orders, and user management — all verified in Postman.

Enterprise QR Code Management System | *Next.js, TypeScript, MongoDB, PostgreSQL, Cloudinary, Zod, Tailwind CSS* | [Live](#)

- Engineered an enterprise QR platform for TalentYug with dynamic QR generation, Cloudinary image storage, and live DB adapter switching between MongoDB and Supabase PostgreSQL.
- Built an advanced print layout engine supporting all paper sizes with user-defined row/column customization, PDF download, and pagination — deployed on Vercel.
- Implemented runtime schema validation with **Zod** and fully type-safe API routes using **TypeScript** across the entire Next.js stack.

Application Management System (AMS) | *React, Vite, Node.js, Express.js, MongoDB, JWT, Google OAuth, Resend, Tailwind CSS*

- Built a multi-role web platform from scratch with RBAC supporting Super Admin, Webinar Host, and Student roles with fully separated access levels and dashboards.
- Super Admin can create hosts, assign webinar topics, view all registrations, and deactivate inactive users — Hosts manage their own sessions independently.
- Designed protected route architecture ensuring each role only accesses its permitted dashboard, with Google OAuth sign-in and Resend for automated role-based emails.

Random Password Generator | *React, Vite, Tailwind CSS, JavaScript* | [Live](#)

- Deployed a responsive password generator on GitHub Pages with real-time strength feedback, one-click clipboard copy, and fully customizable character options.

TRAINING & CERTIFICATIONS

Full Stack Web Development — Certificate of Completion

MERN Stack: MongoDB, Express.js, React, Node.js

Code for India

Jan 2026 – May 2026 (5 Months)

- Completed 5-month intensive MERN stack training covering REST API design, JWT authentication, React state management, MongoDB schema design, and cloud deployment.
- Built and shipped multiple full-stack applications including a URL Shortener, Task Manager, and other production-grade projects covering auth, database design, and API integration.
- Awarded **Certificate of Completion** in Full Stack Web Development upon finishing all modules and project deliverables.

TECHNICAL SKILLS

Languages : JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend : React.js, Next.js, Tailwind CSS, Vite, Context API

Backend : Node.js, Express.js, REST APIs, JWT, OAuth 2.0, Google Auth, Resend

Databases : MongoDB, PostgreSQL (Supabase), Mongoose, MongoDB Atlas

Tools : Git, GitHub, VS Code, Postman, MongoDB Compass, Cloudinary, Vercel, GitHub Pages
